

The under steps counting when the menu is displayed.

[Change Gold]

Function

- Increase or decrease the player's money.

Settings

- Define the operation under [Operation].

Increase Money Increases amount of money in possession.

Decrease Money Decreases amount of money in possession.

- Under [Operand], choose the value of money to change the player's money by.

Constant Increases or decreases the amount by a fixed value. Takes a numerical value between 1~999999 as input.

Variable Increases or decreases the amount by the value stored in a variable. For example, if variable no. 2 is specified, which contains the value “5” when the command is carried out, the amount of money will change by 5.
