

The variable to be used can be specified by clicking the [...] button to bring up the [Variables] window.

[Change Items]

Function

- Adds or removes items from the player's inventory.
- 1 type of item can be added or removed per command.

Settings

The screenshot shows a 'Change Items' dialog box with the following settings:

- Operation:** ☒ Increase, ☐ Decrease
- Item:** ☒ Fixed (Potion), ☐ Variable [...]
- Operand:** ☒ Constant (1), ☐ Variable [...]

Buttons: OK, Cancel, Help

- Under [Operation], specify whether to add or remove an item.

Add Item Adds items to the player's inventory.

Remove Item Removes items from the player's inventory.

- Under [Item], specify the item to change using the [Operation].

Fixed A particular item will be changed. Choose the item from the dropdown menu.

The item with the same number as the value stored in the given variable will be the target.

Variable For example, if variable no. 2 is specified which contains “5” at the time the command is processed, item no. 5 will become the target of this command.

Choose the variable to use from the [Variables] window which can be opened by clicking the [...] button.

- Under [Operand], choose one of the following methods to specify the amount by which the HP should be changed using the [Operation].

Constant Uses a constant value. Enter the value to change by within a range of 1~9999.

The item with the same number as the value stored in the given variable will be the target.

Variable Uses a value stored in a variable. For example, if variable no. 2 is specified which contains “5” at the time the command is processed, the amount changed will be “5”.

Choose the variable to use from the [Variables] window which can be opened by clicking the [...] button.

- Items equipped by actors in the party cannot be removed using this command.
