

- The ranges for each stat are: maximum HP between 1~9999, maximum MP 0~999, and 1~999 for other stats.

[Change Skills]

Function

- Makes an actor learn a new skill (be able to use it) or forget a skill (lose the ability to use it).

Settings

- Under [Actor], specify the actor whose should learn/forget a skill.

Entire Party All the members of the party at the time the command is carried out will be the targets of this command.

Fixed A particular actor will be the target. Choose the actor from the dropdown menu.
The actor with the same number as the value stored in the given variable will be the target.

Variable For example, if variable no. 2 is specified which contains “5” at the time the command is processed, actor no. 5 will become the target of this command.
Choose the variable to use from the [Variable] window which can be opened by clicking the [...] button.

- Under [Operation], choose whether to learn or forget a skill.

Learn A skill will become usable.

Forget A skill will become unusable.

- Under [Skills], specify the skill to be learned (or forgotten) through one of the following methods.

Fixed Specify a fixed skill. Choose the skill from the dropdown menu.
The skill with the same number as the value stored in the given variable will be the target.

Variable For example, if variable no. 2 is specified which contains “5” at the time the command is processed, skill no. 5 will be learned (or forgotten).
