

[operation].

[Change MP]

Function

- Changes an actor's MP.

Settings

The screenshot shows a 'Change MP' dialog box with the following settings:

- Actor:**
 - ☒ Entire Party
 - ☐ Fixed
 - ☐ Variable
- Operation:**
 - ☒ Increase
 - ☐ Decrease
- Operand:**
 - ☐ Constant
 - ☒ Variable

The 'Variable' field under the Operand section contains the text '0001:Original'.

- Under [Target], specify the actor whose MP should be changed.

Entire Party All the members of the party at the time the command is carried out will be the targets of this command.

Fixed A particular actor will be the target. Choose the actor from the dropdown menu.
The actor with the same number as the value stored in the given variable will be the target.

Variable For example, if variable no. 2 is specified which contains “5” at the time the command is processed, actor no. 5 will become the target of this command.

Choose the variable to use from the [Variable] window which can be opened by clicking the [...] button.

- Under [Operation], specify whether the actor should recover or lose MP.

Increase Adds MP.

Decrease Reduces MP.

- Under [Operand], choose one of the following methods to specify the amount by which the MP should be changed using the [Operation].

Fixed Uses a constant value. Enter the value to change by within a range of 1~9999.
Uses a value stored in a variable.

Variable For example, if variable no. 2 is specified which contains “5” at the time the command is processed, skill no. 5 will be learned (or forgotten).

Choose the variable to use from the [Variable] window which can be opened by clicking the [...] button.
