

2. Under [New name], enter the new title for the actor. The name should be a maximum of 12 characters.

# [Change Actor Graphic]

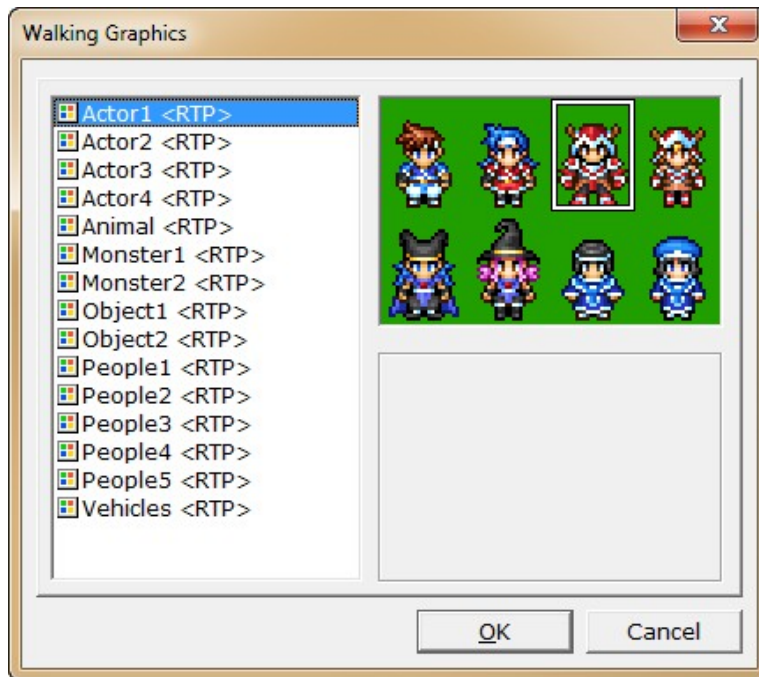

## Function

- Changes the actor's sprite.

## Settings

- The process is as follows.
  1. From the [Actor] dropdown menu, choose the actor whose sprite is to be changed. The current sprite will be displayed.
  2. Click the [Settings] button under [Sprite], and open the [Sprite] window (see below).

3. Choose the image file that contains the new sprites from the list on the left side of the window.
4. Click the sprites to use, and click the [OK] button. The changed image will be shown under [Sprite].

- If the [Transparent] option is selected, the character display will show the character being partially transparent.
