

[Name Input Processing]

Function

- Opens the Name Input Processing.
- The player will be able to name actors in-game.

Settings

- Under [Actor], the actor whose name is to be changed can be chosen from the dropdown menu.
- [Initial Entry Mode] is used to specify whether the initial naming screen is in [Letters] or [Symbols].
- If [Show Default Name] is selected in [Option], the original name will already be entered in the name field when the name entry screen is shown.

Notes

- Controls for name entry are as follows:

Direction

Move cursor

Keys

Select Key Add the character that the cursor is on to the name

Cancel Key Remove the last character of the name
