

The location to contain the event ID of must be located on the same map as the event that contains the command.

[Hide Screen]

Function

- Temporarily clears the screen.

Settings

- Under [Transition Setting], the screen transition method can be specified. If set to [Default], the transition method set under [Transfer Player] in [System] will be used.

Notes

- If the screen is cleared before a [Transfer] command is used, the transition method set under [Transfer Player] in [System] will be ignored and the move will be performed while the screen is cleared.
