

- On maps that do not scroll, this command has no effect on scrolling.

[Set Weather Effects]

Function

- Controls the display of images for rain and snow effects.

Settings

- Under [Effect settings], choose the type of weather effect to display.
 - None: Stop weather effects.
 - Rain: Displays rain images.
 - Snow: Displays snow images.
 - Mist: Shows mist images.
 - Sandstorm: Shows sandstorm images.
- Under [Strength], choose from [Weak] [Medium] [Strong] for the strength of rain or snow, thickness of fog or amount of sand/strength of wind for sandstorms.

This can only be set if “Rain”, “Snow”, “Mist” or “Sandstorm” is chosen from [Effect type].

Notes

- Effect images continue to be displayed even after moving to another map. They are also shown on the battle screen.
- Rain and snow cannot fall at the same time. If either is already in effect, it will be stopped when another effect is started.
