

[Move Picture]

Function

- Changes the position, zoom, transparency and/or effects of a displayed picture. A transition period can be specified in order to move the picture over the screen or change its effect properties gradually.

Settings

The screenshot shows the 'Move Picture' dialog box with a blue title bar and a close button. The dialog is divided into several sections. A red rectangle highlights the main settings area, which includes the 'Number' section (with 'Constant' selected and value '1'), the 'Display Position' section (with 'Constant' selected and X: 160, Y: 120), the 'Zoom' section (with 'Constant' selected and value '100 %'), and the 'Transparency' section (with 'Constant' selected and value '0 %'). A red circle with the number '1' is placed over the 'Display Position' section. Below the red rectangle, the 'Time' section shows a value of '10' with a multiplier of 'x0.1 seconds', and the 'Operation' section has a checked box for 'Wait for Completion'. A red circle with the number '2' is placed over the 'Time' section, and a red circle with the number '3' is placed over the 'Operation' section. At the bottom right, there are three buttons: 'OK', 'Cancel', and 'Help'.

1. Number, Display Position, Picture Settings, Zoom, Transparency

- Under [Number], select the ID of the picture whose properties you want to change.
- Please refer to [[Show Picture](#)] for a detailed descriptions of the options under [Number], [Display Position], [Picture Settings], [Zoom] and [Transparency].
 - It is not possible to modify the [Scroll Picture with Map], [Picture Graphic], [Spritesheet] and [Use Transparent Color] options from a [Move Picture] command. Use [Show Picture] instead.

2. Time

- Under [Time], enter the duration of time used to change the picture display gradually (e.g. move the picture across the screen) in units of 0.1 seconds. The range is 0~1000. Use zero to change the picture's properties to their new values instantly.

3. Operation

- If [Wait for Completion] is enabled under [Operation], event processing will not continue until processing of this command is complete.
