

[Wait for All Movement]

Function

- Carry out all commands in a [Move route] set before this event command, ignoring player controls.

Settings

- There are no settings.

Notes

- When the [Move route] is completed, this event command finishes processing. For this reason, if the move route is not completed, the game will not continue.
This situation may be avoidable if the [Skip If Cannot Move] option is selected under [Move route] or the [Through ON] command is used.
- If [Repeat Action] is enabled under [Move route], the actions will be repeated and the game will stop being responsive.
