

[Fadeout BGM]

Function

- Slowly lowers the volume of the current BGM (fadeout).

Settings

- Under [Fadeout time], the amount of time taken before the music stops can be set within a range of 20 seconds. Click and drag the scrollbar to set the time. Each option can be set by dragging their respective sliders.
-  is pressed, the BGM selector will be used to replay the BGM in the editor.
-  is pressed, the fadeout will begin. This can be used to check the effect of the fadeout as it will be heard in the game.

Notes
