Option
☐ Show Level Up message

OK Cancel Help

- Under [Actor], choose the actor whose job to change.
- Under [Class], choose the new job to change to.
- Under [Level], choose the level of the character after changing job.
 - **No change:** The actor's level remains the same.
 - **Set to 1:** The actor's level will be set to level 1.
- Under [Skills], use radio buttons to choose whether the actor can learn skills gained at levels below the current level under the new job.
 - **No change:** No new skills are learned.
 - **Learn based on level:** Automatically learns new skills that a character with the new job would already have learned at the actor's current level. (Skills learned before changing job will disappear)

- **Learn additionally:** Skills that a character with the new job would already have learned at the actor's current level will be learned on top of the actor's old skills.
- Under [Stat change], use radio buttons to choose how character stats will change after the job change.
 - **No change:** The actor's stats will remain the same.
 - **Halve:** Halves all the stat values.
 - **Set to level 1:** Stats will be set to the values they would be at level 1 under the new job.
 - **Change based on level:** Stats will be set to the values they would be at the current level under the new job.
- If [Show Level Up message] is enabled under [Option], the level up and new skill learned messages will be displayed either change.
